for the
Environment

SERVECO was founded in 1987, operating in the environmental and ecological fields.

The “Environmental Clearances” sector of Serveco makes use of the competence and of the experience of its high-skilled staff; the multiple experiences, which we have gathered during the past years, allow us to diversify and to specialize the different action areas in order to provide pioneering services, also above the normal market standards.

ABESTOS' ACTION AREA

- ❑ Preparation and submission to the territory's AUSL of a Plan of Activities, according to the art. 256 duodecies d.lgs. 81/08.
- ❑ Reclamation of materials containing asbestos (according to D.M. 06/09/04) by removal or sealed packaging or covering.
- ❑ Removal of loose asbestos by Glove-bag technique or confinement in protected sites.
- ❑ Installation and rental of decontamination units, air extractors, exhaust water filtering units.
- ❑ Environmental monitoring of asbestos fibres in the air and analysis of samples.
- ❑ Transportation and elimination of materials containing asbestos, according to regulations.

CONTAMINATED SITES' ACTION AREA

- ❑ Drawing up of **characterization plan** ex D.lgs. 152/6. Geognostic, geoelectric and georadar investigations.
- ❑ Soil Gas survey.
- ❑ Drawing up of **"specific site-risk evaluations"** ex D.lgs. 152/06.
- ❑ Drawing up of projects and control plans post operam.
- ❑ Reclamation and recovery of polluted equipments, tanks, plants and areas by substances such as polychlorobifenile, chrome VI, lead, hydrocarbon and other hazardous substances.
- ❑ Flying squad for emergency cases in order to adopt safety measures.
- ❑ Drainage of contaminated lands trough on site and off site technologies (soil stabilization and interting, Soil Washing, Land farming, Biopila, Bio-venting, Air sparking, Soil Vapour Extration, Pump & Treat, reactive barriers, etc...).

BUILDING'S ACTION AREA AND OTHER SERVICES

- ❑ **Maintenance and laying of new roofs** with insulation panels, galvanized metal sheets, or ecological cement fibre.
- ❑ **Deployment of industrial and civil pavements.**
- ❑ **Industrial insulation** with alternative materials to asbestos and ceramic fibres, on air ducts, steams pipes, heating plants, engine equipments, boilers, etc. and concerning maintenance.
- ❑ **Surface treatment and coating** (cleaning of historical buildings, monuments, roads, metal surfaces from graffito designs, paints, varnishes, dust; breaking up of the surfaces of topsoil or pavement, remaking of polluted industrial surfaces, remaking of flight decks of civil and military naval units, etc.).
