**MICRO & MACRO
COLLECTION**

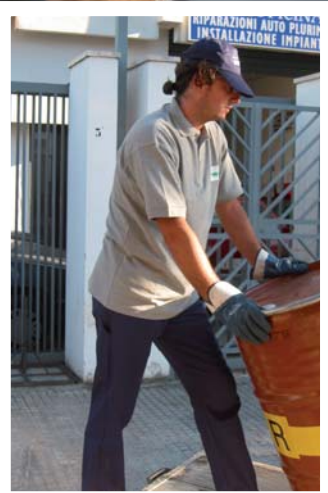

microcollection

Serveco supplies also with a consulting service regarding the temporarily waste storage: for example, the company illustrates to the customer the rules for a correct labelling and packaging of the waste. Serveco's experts offer a prescriptive consulting about specific problems related to the waste matter: air emission and drain of meteoric water.

La **SERVECO** carries out micro collection services of industrial and handwork waste in more than 2.500 small and medium enterprises within Apulia and Basilicata regions. To these enterprises **SERVECO** supplies with:

- ➔ Collecting, transport and disposal/recovery of hazardous and not hazardous special waste.
- ➔ First storage and disposal of special waste.
- ➔ Keeping of the loading and unloading registers and drawing up of the annual statement (MUD).
- ➔ Technical consultancy about the different methods of waste disposal/recovery.
- ➔ Updating of regulations and tax reduction practices.
- ➔ Computerized online service that allows companies, which produce special waste, to download the register directly by the company with input and check of the data at the Serveco's service centre.

Some kind of collected waste: packing of mixed material: (plastic, glass, sheet, ...) sludge from carwash drains, sludge from solvent distillation (printing houses, car body repair's shop), sludge from car paint cabins (carpentry shop, car body repair's shop ...), mud from IMHOFF wells, exhausted activated carbon, lead battery, vegetable oils and exhausted minerals...

macrocollection

Collection, transport, first storage, disposal and recovery of hazardous and not hazardous waste from big enterprises, shopping mall, local health centres, public bodies and military and civil administrations.

The service includes a specialized technical consulting in order to do:

- ➔ Analysis of the production cycle.
- ➔ Identification of the waste characteristics under the point of view of the study of commodities.
- ➔ Recognition of the correct managing aiming to the final waste disposal/recovery.

SERVECO has at its disposal a wide car and equipments park that guarantees to the customer an efficient managing of the loading operations in order to spare time and to cut service costs.
